Rat Barrier:

The natural urban environment of rats is in our sewer systems. Occasionally, the rats go up the maze of our sewer pipes at the end of the road, they then enter our houses, offices and factories causing serious damage and transmitting diseases.

The Rat Barrier is a unique product that has been specifically designed to block the access of rats and other rodents from the sewer and drainage pipes without effecting the flow of effluent or drainage water while at the same time blocking entry to all rodents.

The rat barrier is a humane rodent control device that does not harm the rats, it simply sends them back to nature.

Main Features:

- Does not affect the flow of sewerage.
- Can be installed on any standard sewer pipe.
- Designed to work in harsh corrosion environments.
- Clean and environmental electric rodent block and does not harm the rodents.
- Can be powered by batteries pack if needed.
- The rat barrier is waterproof and not effected by detergents.
- The device does not harm the rodents but blocks them from getting in through the sewer pipes.
- Simple installation.
- Designed and manufactured in Israel.
- Fits any standard sewer pipe.
- **100% rodent free area.**
